

SPAR 1

INDEFINIS-EXTRUDES-CLIP

Nip guards for idler rollers

The SPAR 1 EX and 1 RI EX prevent limbs from getting jammed between the belt and idler rollers.

They provide indispensable protection and can be fitted to any type of belt conveyor idler.

- Made from our specially-tested Polyspar material.
- Installs in front of the carrying idlers at the nip point level.
- Designed to perfectly fit the curve of rollers 89 mm or 133 mm in diameter.
- Can be used with almost any idler frame or bracket, thanks to its mounting brackets.
- Has a very long service life when properly adjusted.
- Available for belts from 500mm to 1400mm. Contact us for other belt widths.

Held in place with u-bolts that are secured with self-locking nuts to adjustable mounting brackets, which enables precise adjustment to perfectly fit any idler frame or bracket on the market.

The SPAR 1 EX and 1 RI EX are made-to-order by us, based on the dimensions of your idler frames or brackets (width and troughing angle).

No special maintenance is needed for the SPAR 1 EX and 1 RI EX, other than an occasional visual verification to ensure that they are properly adjusted.
