

SPAR 4

Product Features:

- ◆ Made of steel and Polyspar to ensure the belt passes smoothly.
- ◆ Extends belt lifespan by preventing stones from becoming wedged between the belt and pulley.
- ◆ Manufactured for 500 to 1200 mm belts and for pulleys of different diameters.
- ◆ Recommended for retrofit installations.

Rock deflector

The SPAR 4 is the guard of choice for preventing accidents during end pulley maintenance.

Thanks to its specially-designed Polyspar components, the SPAR 4 adjusts perfectly to the shape of the belt and deflects all products that could damage the belt.

The SPAR 4 protects personnel by completely covering one of the most dangerous nip points.

This rock deflector greatly reduces the risks associated with cleaning the tail end of the conveyor belt.

We do not warrant that our guards will meet all local codes. It is the responsibility of the end user to have them checked by a local inspector.
