

SPARET EX

Product Features:

- ◆ The SPARET EX consists of Polyspar bars attached to brackets.
- ◆ The main advantages of the SPARET EX are: no moving parts, good sliding properties, low wear and easy maintenance.
- ◆ The SPARET EX can be adapted to any belt configuration ranging from a flat belt to a 75° trough.

Loading point

The new SPARET EX loading point is made with Polyspar sliding bars fitted on brackets.

The SPARET EX is designed to replace rollers directly under transfer points.

The SPARET EX fits easily on new conveyor frames and retrofits.

Good loading point sealing in trough configuration.

Able to handle material sizes of 100 mm or less.

For larger material sizes, the SPARMAT is recommended.
