

TRANSPAR EX

Belt conveyor sealing system

- The TRANSPAR EX is our most versatile and effective dust confinement tool design for conveyor belt. By combining the principle of a deep trough with external sliding rails and flexible self-adjusting skirts.
- The TRANSPAR EX transforms your conveyor into a dust-tight tube. It can be used with material transfer conveyors, located where it meets another conveyor, a screen or a crusher. It may be equipped with a SPARMAT impact bed to absorb the shocks caused by heavy material striking the belt at high velocity.

PRODUCTS FEATURES

- Deep trough ranging from 45° to 75°
- Maze sealing system
- Ultra-high density polymer sliding panel
- Galvanized chassis
- May be easily connected to a dedusting system
- Compatible with all loading table by R.BRUNONE
- Available for belts from 18" to 96" wide and at least 10' (3 m) long

- ♦ Reduce dust and spills by 95%
- ♦ Reduce the need to clean belts by over 200%
- ♦ Eliminate the need for daily skirt adjustment
- ♦ Reduce general conveyor maintenance
- ♦ No loss of sealing tightness in case of belt misalignment
- ♦ Quick and sizable payback
