

# CTR SPAR

## PRODUCT FEATURES

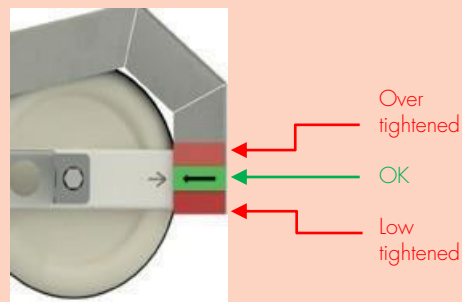

- Simple and robust mechanism in stainless steel.
- Adaptable to all frames.
- Optional inductive sensor.

## TIGHTENER/ROTATION CONTROLER

- The CTR SPAR not only allows you to check that your belt is running, it also allows you to control your belt tension.
- A tension indicator quickly indicates to you, by a set of colors, if your belt is correctly tightened.

Eliminates all risks associated with incorrect belt tension adjustment such as :

- In case of low tightened :
  - Increase power consumption
  - Risk of the belt slipping causing wear of the drum and risk of jamming and therefore production stops
- In case of over tightened :
  - Risk of breakage of bearings and drums
  - Breakage of the junction resulting in more difficult adjustments
