

SPARGAET EX

PRODUCT FEATURES

- The SPARGAET EX has two degrees of freedom :
 - the **flexibility of the belt**, thanks to its position relative to the damping blocks
 - the **chains' vertical movement** when material falls on the blocks
- Ideal for **belts from 500 to 1000mm wide**.
- The SPARGAET EX is made of smooth individual Polyspar blocks linked by steel chains.
- The SPARGAET EX is ideal for **material sizes under 100mm**.
For larger material sizes, contact us.

DEEP TROUGHING SYSTEM

- The SPARGAET EX eliminates idlers and traditional skirtboard.
- Eliminates the risk of nip point accidents, that are especially dangerous at loading point.
- The SPARGAET EX makes it easy to position material properly on the belt.
- The lateral rails make it possible to **raise the belt edges and create a 65° trough**.

The SPARGAET EX :

- eliminates nip points at loading zones
- eliminates the need for metal skirtboards
- improve belt tracking

Thanks to the SPARGAET EX chain system, **adjustments can be made easily, quickly and precisely.**

The transition zone and troughability must be 1,5 to 2 times the width of the belt, based on belt type and speed.
