SPARET WITH CHAINS

PRODUCT FEATURES

- The **SPARET with chains** has **two degrees of freedom** :
 - the flexibility of the belt, thanks to its position relative to the damping blocks
 - the chain's vertical movement when material falls on the blocks
- Ideal for **500 to 1000mm** wide belts.
- Made of smooth individual Polyspar blocks linked by steel chains.
- The lateral rails of the **SPARET with chains** make it possible to raise the belt edges from 0° to 45° **without using troughing idlers**.
- The **SPARET with chains** is ideal for material sizes **less than 100mm**. For larger material sizes, contact us.

THE TROUGHING MATTRESS

- The **SPARET with chains** is a troughing mattress designed **to fit all types of belt conveyors**.
- **Eliminates the risks of accidents** caused by pinch points at the loading point.
- The **SPARET with chains** make it easier to load on the center of the belt and offers an **excellent tightness level**.

The **SPARET** chain system allows an **easily, quickly and precisely adjustments**.

Its lateral glides rails ensure a **permanent contact** between the conveyor belt and the rubber.

The **SPARET with chains** improves belt tracking.

It's a low profile system and can be **installed easily** on belt conveyors.
